

How can I view a PowerPoint show without using full screen?

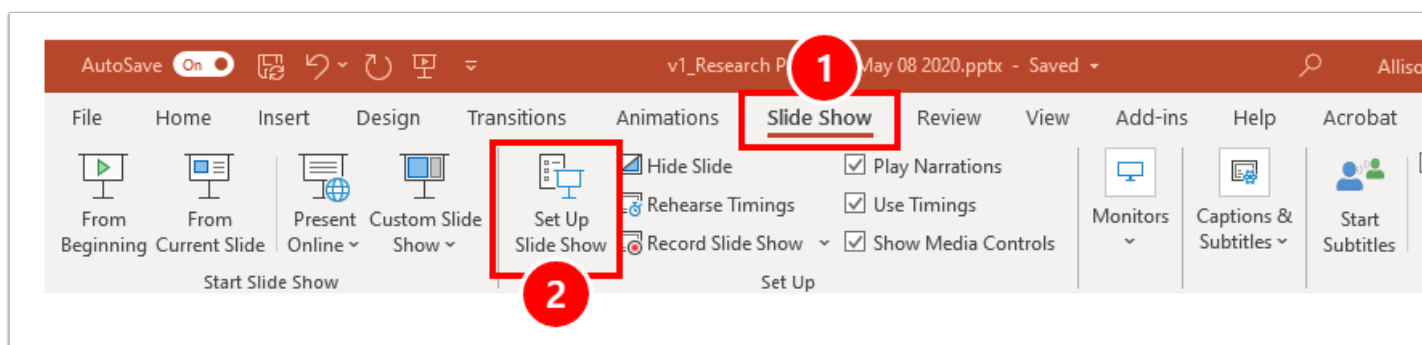

This guide provides instructions on how to set your PowerPoint (for Windows) application to play your slide show in a window, not in full screen. This is particularly useful if you are participating in a video call and might want to see the presentation, your notes, and the webinar interface.

Please note: To display your presenter notes, you will need a two monitor set up.

How to display a slide show in a window:

1. [Select "Set up Slide Show" on the "Slide Show" tab](#)
2. [Select the radio option, "Browsed by an individual \(window\)"](#)
3. [Start your PowerPoint show](#)
4. [To exit the show, use the "Normal" button to return to the file editing interface.](#)

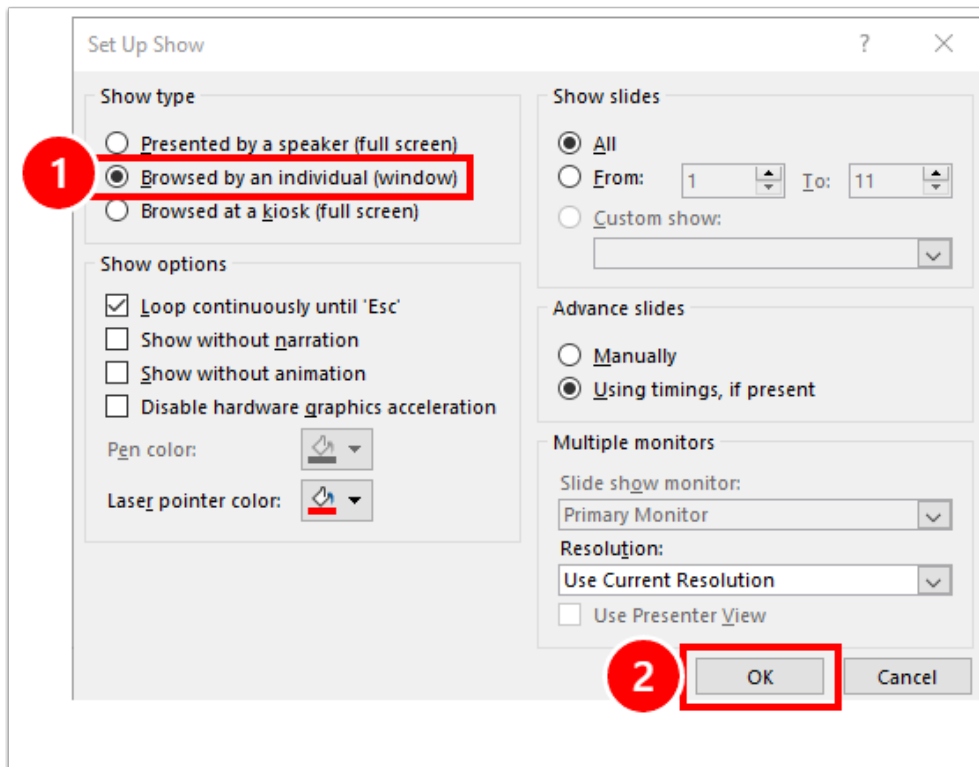

1. Select "Set up Slide Show" on the "Slide Show" tab.

1. Navigate to the "**Slide Show**" tab.
2. Select on "**Set up Slide Show.**"

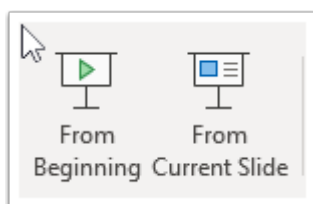

2. Select the radio option, "Browsed by an individual (window)"

1. Select "Browsed by an individual (window)" radio button option.
2. Select on "OK" to save your changes.

3. Start your PowerPoint show (as per normal).

4. To exit the show, use the "Normal" button to return to the file editing interface.
